PROJECTS

Dubs's Liquors Website — *Website for Local Business*

Found at www.DubsOnline.com, the website was written for the business using HTML, CSS, and Bootstrap. This was a solo project & occasional updating and maintenance still takes place.

HiveList — *Spotify Web App*

Created a web application designed around the Spotify API allowing users to create playlists with specified contributors, with an implemented voting system. Created in a six person team in a web applications course.

TagX — *HPE Tagging System*

Done as a ten-member team in a software engineering course. Project explored the software engineering design process, such as documentation, different approaches to dev teams, as well as implementing planned features.

EDUCATION

University of Massachusetts, Amherst, MA
